## ALL IS WELL

After five straight monthly gains by the Standard \& Poor's 500 Index to close out 2004, some profit-taking was overdue. The stock market stumbled out of the gate in 2005 and registered 2.5 to $5.2 \%$ losses in the major indices. After a brief rally in the first two weeks of February, we forecast that the market will gain very little further ground or perhaps decline a little before mid-March or so. Earnings reports for the fourth quarter of 2004 have exceeded expectations, but management forecasts for slowing growth in 2005 are holding back investors' enthusiasm.

The US economy continues to grow at a reasonable pace. Gross Domestic Product increased $3.1 \%$ in the fourth quarter. We believe that the economy will continue at that pace throughout 2005. We consider the pace to be just right - not too fast and not too slow. The industrial, retail, and homebuilding sectors of the economy continue to be solid. All is well - enabling the stock market to remain healthy. And in this environment, investors can expect undervalued quality stocks to perform well.

In this month's Special Feature, we uncover several stocks whose earnings are accelerating beyond analysts' expectations. We predict that these stocks will perform very well during the next six months or so.

In the Classic Model (page 2), we are recommending the sale of two of our homebuilding stocks that reached their Minimum Sale Prices. We think that we are a bit early in these sales, but we would much rather be a little early than late.
""'The prudent stock investor is one who buys only at prices amply supported by underlying value."

## THE CLASSIC BENJAMIN GRAHAM VALUE MODEL

The stocks in the Classic Model meet Benjamin Graham's seven criteria for value.
Benjamin Graham achieved returns of $20 \%$ per year over decades. Warren Buffett has used this approach for over 35 years with similar results. The table below lists the stocks that are this month's recommendations for purchase. All purchases are recommended at or below our Max. Buy Price. Sell any stock that reaches its Min. Sell target.

MODEL UPDATE
The Classic Benjamin Graham Value Model has one new stock this month: Magna International, plus eight stocks that are holdovers from last month. There are four stocks that are currently selling below our Max Buy Prices. The remaining five stocks in the Model should not be purchased until they decline to our Max Buy Prices. Devon and Village do not meet all of our criteria, but Devon is excused because it is an energy company, and Village's current ratio will exceed our minimum 1.50 ratio very soon.

The current Minimum Sell Prices for previous Classic Value Model stocks are: Ameron \$45.52, Aon \$41.50, Countrywide Financial \$48.41, Fidelity National \$52.06, Furniture Brands \$38.99, Honda Motor \$41.95, Kellwood \$52.92, Korea Electric \$26.98, Lennar \$70.23, MBIA \$80.02, Norsk Hydro \$81.07, and ONEOK $\$ 31.05$. These stocks should continue to be held until they reach their Min Sell Prices. There are two sales recommended at this time. Standard Pacific reached its Min Sell Price of $\$ 67.31$ in January and is recommended to be SOLD. The stock gained $40.2 \%$ since we first recommended it in our July 2004 issue. KB Home also reached its Min Sell Price of $\$ 111.83$ on Feb. 1 and is recommended to be SOLD. KB gained $95.4 \%$ since we first recommended it in our Sept. 2003 issue.

## FEATURED STOCKS

## Magna International 'A' (MGA)

How Cheap Is It? Shares of Magna International sell at a very reasonable 9.0 times our 2005 earnings estimate and at 1.2 times book value, based on our Max Buy Price of $\$ 71.74$. We believe that Magna presents an excellent buying opportunity in a company with accelerating sales and earnings and a good dividend yield of $2.0 \%$. MGA shares will likely reach our Min Sell Price of $\$ 117.98$ within three years.

## PERFORMANCE FOR THE CLASSIC BENJAMIN GRAHAM VALUE MODEL

The Classic Benjamin Graham Value Model gained $1.98 \%$ last month compared to a loss of $2.72 \%$ for the Dow Jones Industrial Average. During the 26 months since inception, the Classic Value Model has beaten the Dow 24 times. The Model is up $173.3 \%$ during that span compared to a gain of just $17.9 \%$ for the Dow. The chart to the right illustrates the Model's performance during the past 26 months.
manufacturing facilities around the world.
Outlook: Magna is winning new contracts and increasing market share in North America and Europe. In third world countries, MGA is aggressively expanding its customer base and product lines. Sales advanced more than $30 \%$ in 2004, and earnings per share increased $10 \%$ to $\$ 6.88$ per share. Improving operational efficiencies will boost earnings to $\$ 7.88$ in 2005, an increase of $15 \%$.

## Old Republic International (ORI)

How Cheap Is It? At our Max Buy Price of \$22.86, Old Republic offers excellent value in a solid, medium-sized company. Earnings growth will accelerate this year, and we predict that the stock will break out of its narrow trading range. ORI shares will likely increase to our Min Sell Price of $\$ 32.13$ within two to three years.

Company Profile: Old Republic markets, underwrites, and manages a wide range of insurance products including property, liability, mortgage guaranty, title, life, and disability insurance. The current insurance environment has allowed ORI to raise prices, add new business, and increase renewal rates. The company has also increased its minimum standards for risk criteria over the past three years, which is lowering costs.

Outlook: Old Republic's mortgage guaranty and title insurance businesses are expected to slow this year due to a slowing real estate market and lower mortgage refinancing. But, the company's other insurance divisions are expected to perform very well. We forecast earnings of $\$ 2.57$ for 2005, up from $\$ 2.32$ in 2004.

## THE WISE OWL MODEL

The Owl Quantitative Rating System is a proprietary system developed by J. Royden Ward.
By screening stocks in the Benjamin Graham Common Stock Database for quality, value, growth and technical strength, the Wise Owl Model offers you more consistent profits and lower volatility than the basic Benjamin Graham Value Model-with nearly equal long-term performance. It is recommended that you buy at or below the Maximum Buy Price. Sell when the stock reaches the Minimum Sell Price or when the Owl Total Rating falls below 6.0.

## MODEL UPDATE

We have added seven new stocks to The Wise Owl Model this month: Several of the new stocks have been recommended recently and now reappear. AFLAC, Illinois Tool, and Wal-Mart have not appeared in prior issues. The replaced stocks are still excellent companies and should continue to be held until they reach their Minimum Sell Prices or their Owl Total Ratings fall below 6.00. Min Sell Prices for all stocks previously recommended in the Wise Owl Model can be found on pages 9 to 12. News updates for each of these stocks can be found in our Mid-Month Update Report.

## FEATURED STOCKS

| AFLAC, Inc. | AFL |
| :--- | :---: |
| Industry: Insurance (Life) |  |
| Price: | $\$ 39.51$ |
| Max. Buy Price: | $\$ 39.26$ |
| Min. Sell Price: | $\$ 60.34$ |

Note: Maximum Buy Prices are valid for the month of February.

## AFLAC, Inc. (AFL)

How Cheap Is It? AFLAC provides an excellent opportunity to buy a high quality specialty insurer that has produced steady earnings and dividend growth for many years. We strongly recommend purchase of AFLAC shares at our Max Buy Price of $\$ 39.26$ in anticipation of achieving our Min Sell Price of $\$ 60.34$ within two to three years.

Company Profile: AFLAC provides supplemental health and life insurance in the U.S. and Japan. The company is the leading global supplemental cancer insurance underwriter and derives $75 \%$ of its revenue and profits from Japan. AFLAC also sells other insurance products. The company has produced an excellent record of steady earnings and dividend growth of more than $15 \%$ during the past 15 years.

Outlook: AFLAC is launching several new products in Japan this year that will boost revenue growth. Further weakness in the US dollar will enhance the company's profit growth. We forecast earnings of $\$ 2.61$ for 2005 compared to \$2.30 in 2004. Earnings should then jump to \$3.00 in 2006.

## Illinois Tool Works (ITW)

How Cheap Is It? Illinois Tool is undervalued after taking into consideration its steady $15 \%$ growth during the past 10 years and its P/E ratio of 15 times earnings. We equate the company to a "mini" General Electric and anticipate a steady rise in the shares. We highly recommend that you purchase ITW with the goal of reaching our Min Sell Price of $\$ 130.49$ within three years.

Company Profile: Illinois Tool Works is a large diversified manufacturer that operates more than 600 industrial and consumer businesses throughout the world. Products designed for the construction and industrial sectors have led recent increased growth.

Outlook: Illinois Tool manufactures a broad array of industrial products that mirror the US industrial economy. Prospects for further growth in the industrial sector augur well for the company. We forecast that earnings growth will accelerate this year to $\$ 5.08$ from $\$ 4.39$ in 2004. Our forecast for 2006 is $\$ 5.73$.

## MODEL PERFORMANCE FOR THE WISE OWL MODEL

The Wise Owl Model lost 2.94\% last month, compared to a loss of $2.53 \%$ for the Standard \& Poor's 500 Index. The chart on the right illustrates the Model's steady performance since inception on $12 / 31 / 95$. The Model has achieved a compound annual return of $20.9 \%$ compared to a $7.4 \%$ return for the S\&P 500. The Wise Owl Model has outperformed the S\&P 500 Index every year for the past 9 years. And we predict more of the same in 2005.

## SPECIAL FEATURE

## Companies with Accelerating Earnings and Excellent Appreciation Potential

Companies that maintain a steady rate of growth of revenues, earnings, and dividends fare quite well in the stock market. Their stock prices tend to advance at a pace greater than the growth rate of earnings. Their price-to-earnings ( $\mathrm{P} / \mathrm{E}$ ) ratios also rise as investors recognize the superior performance of steady earnings growth by the company. But, to find stocks that can really advance quickly, earnings acceleration is essential.

This month, we screened our Benjamin Graham Common Stock Database to find companies whose earnings are accelerating and whose earnings estimates are being increased by analysts. We follow a large number of independent research services that rate stocks using various criteria. Zacks and Investors Business Daily (IBD) offer ratings that measure earnings acceleration, analyst upgrades, and estimate increases. We found nine companies that are ranked above 85 by IBD and 7 that are ranked 1 (highest) by Zacks.

We believe that the nine stocks recommended below offer excellent appreciation potential. During the next six months, you should check to make sure that earnings are continuing to accelerate. When earnings start to decelerate, a company's stock price will usually start to decline. This is especially true when a company has a high price-to-earnings ratio, such as Cognizant. If you would like an update on a company's progress, please email me at roy @benjamingraham.com to receive my current opinion.

Chico's FAS (CHS) is a specialty retailer of exclusively designed fine apparel for women. Successful marketing strategies (including a unique club for its customers) and a recent acquisition are enabling the company to continue its rapid growth. We forecast earnings per share (EPS) of $\$ 1.60$ for the fiscal year ending $1 / 31 / 05$, up sharply from $\$ 1.14$ a year ago. Our EPS estimate for $1 / 31 / 06$ is $\$ 2.00$.

Cognizant Technology (CTSH) provides complex software solutions to businesses that are transitioning to e-commerce. Demand for Cognizant's services is thriving in the US and Europe. The
company is now offering additional services to deepen its customer relationships. Earnings were $\$ .69$ in 2004 compared to $\$ .44$ in 2003. Our forecast for 2005 is $\$ .93$.

Commercial Metals (CMC) recycles metals and manufactures steel from its recycling business. The company has benefited from high scrap metal prices and from increased demand for steel. Earnings are forecast at $\$ 4.00$ for the fiscal year ending $8 / 31 / 05$ compared to $\$ 2.21$ a year ago. Earnings in 2006 will depend on the level of demand from China and its impact on steel prices.
D.R. Horton (DHI) is a leading homebuilder that operates in all of the faster growing areas of the US. The company has a superior materials purchasing program that enables it to build its homes at lower cost. We forecast earnings of $\$ 5.07$ for the fiscal year ending 9/30/05 compared to $\$ 4.11$ for 2004. Earnings will likely advance further to $\$ 5.40$ in 2006.

Legg Mason (LM) is a regional asset management and securities brokerage firm operating in the mid-Atlantic and Southeastern regions of the US. Strong demand for its management and brokerage services has created rapid growth for the company. We estimate that EPS for the fiscal year ending $3 / 31 / 05$ will be $\$ 3.54$ compared to $\$ 2.64$ last year. Our estimate for 2006 is $\$ 4.30$.

Lennar Corp. (LEN) is a Florida based homebuilder that builds single and multi-family homes throughout most of the US. Pent-up demand caused by hurricanes in FL last year will boost growth in 2005. Our forecast for EPS for the fiscal year ending $11 / 30 / 05$ is $\$ 6.82$ compared to $\$ 5.70$ last year. We estimate that LEN will earn $\$ 7.50$ in 2006.

Overseas Shipholding (OSG) is a leading international petroleum shipping company with 62 tankers and 4 jointly owned ultra-large tankers. Shipping rates have increased significantly and have doubled for the services of the ultra-large tankers during the past year. Earnings skyrocketed from $\$ 3.54$ in 2003 to an estimated $\$ 8.59$ in 2004. Our estimate for 2005 EPS is $\$ 10.80$.

XTO Energy (XTO) acquires, explores for, produces, and transports oil and natural gas. The company's successful acquisition and drilling programs coupled with high energy prices are fueling rapid growth. We forecast earnings of $\$ 2.30$ for 2004, up sharply from $\$ 1.26$ in 2003. We forecast another jump in EPS in 2005 to $\$ 3.05$.

Yellow Roadway (YELL) is the nation's third largest ground transportation company. The acquisition of Roadway Express by Yellow in 12/03 is creating larger-than-expected cost savings and rapid earnings growth. Earnings climbed from $\$ 2.19$ to $\$ 3.97$ in 2004. We estimate that EPS will jump to $\$ 5.17$ in 2005 and then to $\$ 5.75$ in 2006.

# THE 250 HIGHEST RANKED WISE OWL STOCKS FROM THE BENJAMIN GRAHAM DATA BASE 

The Highest Ranked Stocks listing relates to the Wise Owl stocks only. After buying a Wise Owl stock, you can monitor its progress by checking the stock's Min Sell Price and Owl Total Rating. If a Wise Owl stock reaches its Min Sell Price, or if the stock's Owl Total Rating has gone below 6.00, or if it no longer appears in the listing, you should sell. We hope that you will find the listing also useful in looking up stocks that you already own or have an interest in.
